## **MBM INDIA - ENVIRONMENT POLICY**

### **1. Introduction**

At MBM India, we believe that true craftsmanship is more than just the longevity of our products; it is also the sustainability of the environment we thrive in. We understand that all creations have an ecological footprint, and it is our duty to make sure that this footprint is positive. We are redefining the concept of being a modern furniture manufacturer through a concept of Life Cycle Thinking. Based on the best practices of ISO 26000 and sustainability achievements of the industry leaders, this policy provides our commitment to restore the planet, empower our communities, and provide our customers with furniture that they can be proud to own. We do not just make furniture; we make a legacy of responsibility.

### **2. Scope**

This policy applies to:

- All MBM employees, contractors, partners, and suppliers.
- All operational locations, manufacturing plants, warehouses, and corporate offices.
- All business activities including procurement, design, manufacturing, logistics, and product end-of-life management.

### **3. Environmental Commitments**

The Company hereby undertakes to:

- Conserving biodiversity, ecosystems and natural resources.
- Minimizing its environmental impact in the value chain.
- Following a precautionary strategy on environmental hazards.
- Eliminating pollution and proper waste disposal.
- Adhering to all environmental laws, standards, local regulations and voluntary commitments.
- Constantly enhancing environmental performance through quantifiable indicators.

### **4. Policy Statements**

MBM India adopts a multi-pillar approach to sustainability, focusing on the following key areas:

#### **A. Sustainable Sourcing & Material Stewardship**

- **Responsible Forestry:** We shall ensure that we focus on sourcing raw materials (wood, veneers, laminates) that are certified sustainable programs (e.g. FSC ® or PEFC accreditation) to prevent deforestation.
- **Local Sourcing:** We shall give preference to domestic suppliers in line with the spirit of “Make in India” to reduce the carbon emissions caused by logistics and to support the local economy.
- **Material Efficiency:** We shall create products in such a way that they maximize the use of materials and reduce the number of off-cuts and scrap that are produced in the manufacturing process.

## **B. Energy Efficiency & Climate Action**

- **Carbon Footprint Reduction:** We shall reduce our specific energy consumption on an annual basis by investing in energy efficient machinery and LED lighting in all our facilities.
- **Renewable Energy:** We shall also explore the feasibility of rooftop solar panels in our manufacturing plants and warehouses to reduce reliance on grid power.
- **Green Manufacturing:** We shall implement low-carbon manufacturing, which shall ensure that our equipment is at its optimum efficiency to prevent energy wastage.

## **C. Waste Management & Circular Economy**

- **Zero Waste to Landfill:** Our long-term goal is to achieve Zero Waste to Landfill. We shall ensure waste segregation at the source into hazardous, non-hazardous and recyclables and keep adequate records for the same.
- **3R Principle:** We shall strictly abide to the Reduce-Reuse-Recycle hierarchy within all our operations.

## **D. Water Stewardship & Pollution Control**

- **Water Efficiency Fixtures:** We shall install water-efficient fixtures and optimize production processes to reduce wastage.
- **Water Treatment:** We shall implement wastewater treatment systems to maintain compliance with CPCB/SPCB norms.
- **Water Recycling:** We shall recycle, and reuse treated water for non-potable purposes.

## **Compliance & Governance**

- **Regulatory Adherence:** MBM India shall comply with all applicable environmental laws, regulations, and standards (including ISO 14001 guidelines).
- **EHS (Environment, Health & Safety):** We recognize that a safe environment is a healthy environment. We shall provide regular training to employees on chemical handling, spill prevention, and emergency response.

## **Community and Stakeholder Engagement**

- We shall support local environmental programs such as cleanliness drives, water conservation efforts, and afforestation.
- We shall communicate our environmental performance transparently through sustainability reporting.
- We shall engage with customers, communities, suppliers, and regulators to promote shared environmental goals.
